Forecast For Yorkshire & the Humber
Issued by Met Office Exeter
at 0400 on Monday 22 Feb 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Outbreaks of rain slowly moving southeast today. Brighter later. Mild.

Today:
Cloud and outbreaks of rain will slowly move southeastwards during the day, before gradually clearing by mid-afternoon. Becoming drier with some brighter spells developing in the north of the region before dusk. Despite the rain it will be mild. Maximum temperature 9 deg C (48 deg F).

Tonight:
Dry with clear spells overnight, which will allow for a touch of frost and some fog patches to form in places. It will turn increasingly cloudy and windy towards dawn. Minimum temperature 2 deg C (36 deg F).

Tuesday:
Tuesday should be largely dry and cloudy, with occasional brighter spells. Perhaps some outbreaks of light rain over the North York moors. A windy day, although it will stay mild. Maximum temperature 12 deg C (54 deg F).

Outlook for Wednesday to Friday:
Wednesday will be largely dry, cloudy, windy and very mild. Generally fine and dry on Thursday and Friday with more sunshine around. Staying on the mild side overall.
